

SUMMARY

With over 5 years of experience in front-end development, specializing in JavaScript and user-centric design, I have significantly enhanced online platforms for top retailers. Notably, I led projects that increased user engagement by 40%. My technical expertise and proven track record make me an excellent fit for contributing to your team.

EXPERIENCE

Front End Developer

Amazon

05/2020 - Present

Seattle, WA

- Led the integration of a responsive web layout using modern JavaScript libraries, which enhanced user engagement by 30%, improving overall customer satisfaction metrics significantly.
- Collaborated with UX/UI designers to revamp the e-commerce site's visual aesthetics, leading to a 25% reduction in bounce rates and an improved user retention rate.
- Implemented performance optimization techniques that decreased load times by 50%, allowing customers to access product pages and checkout processes much quicker than before.
- Contributed to the development of a new feature set utilizing React, producing an increase in page-time metrics, improving conversion rates by 15% across the platform.
- Conducted regular code reviews and collaborative brainstorming sessions, fostering a culture of continuous improvement, which led to a team-wide reduction in coding errors by 40%.
- Participated in cross-functional teams that executed multiple enhancements, resulting in an aggressive deployment schedule, increasing our ability to deliver quality features ahead of deadlines.

Web Developer

Walmart

01/2018 - 04/2020

Bentonville, AR

- Designed and built user-friendly web applications that optimized the digital shopping experience, resulting in a 20% increase in online sales for the holiday season.
- Collaborated with backend development teams to streamline RESTful API utilization, improving data retrieval speeds and enhancing the overall user interface experience.
- Resolved complex website issues through rigorous performance testing, which avoided potential downtime incidents and maintained a 99.9% uptime across all services.
- Engaged in agile development processes, attending daily stand-up meetings that improved team productivity levels by 35%, including implementing feedback mechanisms for ongoing project adjustments.
- Facilitated workshops for junior developers, enhancing their understanding of programming paradigms and reducing onboarding time by 20%.

Junior Developer

Target

06/2016 - 12/2017

Minneapolis, MN

- Supported senior developers in constructing web applications that aligned with user requirements, leading to the successful launch of three high-traffic features.
- Monitored the implementation of best coding practices and standards, achieving a 15% reduction in post-launch bugs compared to previous project cycles.
- Assisted in the transition from traditional to responsive web design, which improved accessibility and engaged a broader user demographic across various devices.
- Documented lessons learned from each project, creating a repository of knowledge that improved efficiency for current and future development teams.

EDUCATION

Bachelor of Science in Computer Science

University of California, Los Angeles

01/2012 - 01/2016

Los Angeles, CA

Master of Science in Information Technology

Stanford University

01/2017 - 01/2019

Stanford, CA

PROJECTS

E-commerce Accessibility Project

Worked on an open-source accessibility project that enhanced usability features for visually impaired users. Check it out at github.com/project-ecommerce-accessibility.

Minimalist Web Template

Contributed to a minimalist open-source web template project designed for quick deployment of landing pages, with emphasis on speed and cleanliness. Visit github.com/project-minimalist-template.

KEY ACHIEVEMENTS

Improved Site Engagement

Revamped site aesthetics and functionality resulting in a 40% increase in user engagement metrics across the board.

Increased Online Sales

Drove consistent improvements in user experience, culminating in an impressive 20% boost in online sales during the holiday shopping season.

Enhanced Code Efficiency

Enabled a culture of continuous improvement that decreased development errors by 30% through exhaustive team collaboration and code reviews.

Successful Project Completion

Successfully led the launch of critical features ahead of tight deadlines, achieving a more efficient project turnaround rate of 15%.
